Subject: 2014 Road Rehabilitation Project, Number 014-9698

Dear Residents:

The City of Lafayette has awarded a construction contract to Argonaut Constructors to reconstruct or re-surface several streets and courts in Lafayette. Please see the reverse side of this notice for the listing. The work will also include replacement of curb and gutter and sidewalk on some of the reconstruction streets.

Work is scheduled to begin this week with an anticipated completion date for the entire project in early October. However, both EBMUD (water) and PG&E (gas) underground utility work must be completed on the reconstruction streets prior to our contractor starting their work. Therefore, this schedule may slip on some of the streets. Weekly updates for the project schedule will be posted on the City's web site at <http://www.ci.lafayette.ca.us> (select "Public Work & Construction" in the quick links section on the left corner of the page; then select "City Construction Projects", and last select the 2014 Road Rehabilitation Project, Project Number 014-9698).

The work will require closure of travel lanes with traffic control and road closures during certain phases of the reconstruction. Traffic control will generally be in effect between 8:00 a.m. and 5:00 p.m. and road closures may be in effect between 8:30 a.m. and 4:30 p.m. Emergency vehicles will be provided access at all times. Please look for the "No Parking" signs posted on barricades at least 48 hours prior to construction activities. These signs will specify the dates and hours of restricted parking. It is imperative that no cars remain parked on the street in the posted areas during the indicated date and time period. Additionally, signs will be posted alerting the public of the road closure days and times. If possible, please make arrangements to park outside the road closure limits or avoid needing to make vehicle trips during the closure hours.

The street work will require pruning all vegetation that encroaches into or overhangs the roadway to allow clearance for the construction equipment. Residents are encouraged to prune their own vegetation to one foot behind the back of the curb and to 14.5 feet high over the road. However, the contractor will prune any vegetation left in conflict at the time of construction. Additionally, if you have any private improvements that are not readily visible or are located near the shoulder of the road or the curb, and that you are concerned may be damaged during construction, please contact me so I can be aware of the improvement and discuss if needed. The referenced improvements may include decorative rock, sewer or storm drain lines and cleanouts, irrigation and landscaping, fencing, etc. Mailboxes will be worked around, or if necessary, relocated.

Please keep in mind that street work often occurs in phases, and once work has begun, it does not necessarily proceed continuously. You will see periods of inactivity between the start and end of the project. The City and the contractor are anxious to complete this project with minimum delay and inconvenience to you. While the work is in progress, please lend us your cooperation and extra patience and be alert to equipment, workers, and traffic.

During construction, questions regarding the work may be directed to Jason Balatti with Argonaut Contractors at (707) 542-4862 or I may be reached at (925) 284-1951. Again, your patience and cooperation are very much appreciated.

Sincerely,

Farzaneh Sanders
Senior Engineer

Street listings are as follows:

1. Black Hawk Road
2. Black Hawk Court
3. Meadowlark Court
4. Eagle Point Road (Black Hawk Road to Eagle Point Court)
5. Candy Court
6. Quandt Court
7. Sandalwood Court
8. Sweetbrier Circle
9. Somerset Drive
10. Acalanes Road (Mt. Diablo Blvd. to El Nido Ranch Road)
11. Reliez Station Road (Olympic Blvd. to Glenside Drive)
