

ADDENDUM #1

CITY OF LAFAYETTE

TAYLOR BLVD / PLEASANT HILL RD SAFETY IMPROVEMENTS

Project Number 014-9709

Federal Aid Project Number HSIPL 5404(027)

The following changes and additions shall become a part of the plans and specifications for the above project, and shall be bound by the General Provisions, Special Provisions, and all other conditions of the Bid Documents.

Clarification is hereby provided regarding Construction Note 3 of the Contract Plan. State Standard Plans include guardrail layout with connections to walls and bridge rails, but no explicitly a concrete barrier. As such, the design intent is for the general layout geometry and terminal system of the guardrail to be installed for the Project to generally conform to State Standard Plan A77P1, Type 11A and 11B, as noted on the Plan. Furthermore, the guardrail is required to connect to the adjacent concrete barrier. The guardrail transitions and connection details are shown in State Standard Plans A78I and A78J. Contractor shall adapt the standard details to actual site conditions to install the project guardrails complete in place with the appropriate alignment, terminal system, transition pieces, and connection details.
