

Susan Candell

I want to again serve on Lafayette City Council because I still have the passion, willingness to listen, and problem-solving engineering background needed to help find positive solutions to the very complex problems facing Lafayette.

These last 4 years were noteworthy due to the Covid shutdown, but with strategic Council decisions to get help for our businesses, combined with our amazingly supportive community, Lafayette's recovery is even faster than expected, and our downtown is again thriving!

I am committed to creating a beautiful and welcoming area around the Park Theater that we all can be very proud of for years to come.

I will continue to pursue improving safety around our schools by working hard to both find and fund projects around each of our schools.

I was very involved with figuring out how to satisfy our commitment to create a Housing Element that will be acceptable to the state and has broad support in our community.

In addition to City Council, I have been actively advocating with fellow city councilmembers and legislators across the state to find real solutions for our affordable housing crisis. I will continue to advocate for local control and look forward to the day when the state looks to cities as their partners and not their adversaries in working towards that goal.

I look forward to continuing to advocate for priorities of our residents, and to help make Lafayette a great place to live, work, and visit.

Please vote for Susan Candell for Lafayette City Council.

Teresa Gerringer

Serving on the Lafayette City Council and as your mayor has been an honor and a privilege. With your vote, I look forward to continuing our work to celebrate all that makes Lafayette a wonderful place to live while doing our part to address local, regional, and global challenges.

Together, we have made progress on our shared priorities - enhancing public safety, particularly transportation safety throughout our community, wildfire preparedness, strengthening our city-schools partnership, and promoting economic vitality. I remain committed to continuing to lead on these priorities.

With over 20 years of leadership in civic organizations and private industry, I will use my background and experience to keep our city government and finances transparent and accountable while ensuring robust, authentic public engagement and outreach as we tackle the day-to-day running of the city and address greater community needs.

As a 26-year resident and former school board member, I'm committed to building a shared sense of community and connection. During my term on council, we implemented our first Lafayette Community Day, worked with schools, and our citizen-led Diversity, Equity, Inclusion, and Belonging task force to make Lafayette more inclusive, celebrated Pride month, and joined #BeKind21 to encourage acts of kindness.

My priority is to work collaboratively to get things done. I listen to community concerns and have made a difference in Lafayette for over two and a half decades. It would be an honor to continue to serve you on the City Council. I humbly ask for your vote.

Wei-Tai Kwok

My wife Violet and I moved to Lafayette 20 years ago to raise our two children from kindergarten through high school. We've been active in local non-profit and neighborhood organizations ever since.

Professionally, I have worked in solar and renewable energy since 2009 in roles ranging from head of global marketing at the world's #1 solar company (\$3 billion revenue) to Chief Operating Officer at an early-stage venture with 70 staff. For 17 years prior, I was co-founder and CEO of my own business with 35 employees in SF. I graduated from Yale University with a BA in Economics & Political Science.

I am running for City Council to achieve our vision of a welcoming, inclusive, safe, family-friendly city for residents and visitors alike. Prior to my City Council appointment in 2021, I served on the Environmental Task Force and the Community Diversity, Equity, Inclusion & Belonging Committee.

My key priorities: wildfire preparedness, transportation safety, congestion reduction, environmental sustainability, fiscal prudence, and smart housing development.

I'm excited about Lafayette's future and would be grateful for your vote. Learn more about me at weitaikwok.com
